

Demonstration of Proposed Features

Date	15 March 2026
Team ID	XXXXXX
Project Name	PocketSmart AI
Maximum Marks	1 Mark

The template tracks whether proposed features were implemented and demonstrated. ■filecite■turn15file9■L7-L17■ Because no demo evidence was supplied, the statuses below are marked Pending/No.

Feature Name	Description	Status	Demonstrated	Remarks
Budget & Preference Input	Capture category, budget and user preferences.	Pending	No	Demonstrate after UI is available.
AI Personalized Recommendations	Generate recommendations based on budget and preferences.	Pending	No	Core feature; requires working AI integration.
Budget Allocation / Optimization	Suggest how the budget can be distributed across planning items.	Pending	No	Demonstrate with a sample budget.
Recommendation Comparison	Compare shortlisted options and estimated spending.	Pending	No	Show side-by-side options.
Multi-Category Support	Support Home Interior, Party Planning and Jewelry use cases.	Pending	No	Demonstrate at least one scenario per category.
Refine & Regenerate	Change preferences and generate a revised recommendation set.	Pending	No	Demonstrate iterative planning workflow.

Feature Implementation Summary

Metric	Count / Value
Total Features Proposed	6
Total Features Implemented	0 verified from supplied evidence
Total Features Demonstrated	0 verified from supplied evidence
Overall Implementation Rate (%)	Not calculated until implementation evidence is available
