

No. of Functional Features Included in the Solution

Date	15 March 2026
Team ID	XXXXXX
Project Name	PocketSmart AI
Maximum Marks	5 Marks

Functional Features Overview

The feature list is derived from the PocketSmart AI concept: budget-aware planning and personalized recommendations across Home Interior, Party Planning and Jewelry use cases. The status values below are conservative because final implementation evidence was not included in the uploaded templates.

S.No	Feature Name	Feature Description	Module / Component	Status	Marks Contribution
1	Category Selection	Select Home Interior, Party Planning or Jewelry as the planning use case.	UI / Planning Module	In Progress	Core
2	Budget & Preference Input	Capture budget, style, occasion, room/event details and other preferences.	Input Module	In Progress	Core
3	Budget Validation	Validate required inputs and ensure budget values are usable.	Validation Module	In Progress	Core
4	AI Recommendations	Generate personalized options based on budget and preferences.	AI Recommendation Service	In Progress	Core
5	Budget Allocation / Optimization	Distribute the available budget across relevant items or services.	Budget Optimization	In Progress	Core
6	Recommendation Comparison	Compare shortlisted options and estimated spending.	Comparison UI	In Progress	Core
7	External Data Integration	Retrieve relevant product/service information from supported sources.	API Integration	Pending	Nice-to-have / Extension
8	Refine & Regenerate	Allow users to change preferences and generate a revised recommendation set.	Recommendation Workflow	Pending	Nice-to-have / Extension

Feature Summary

Metric	Count / Value
Total Features Planned	8
Total Features Implemented	0 verified from supplied evidence
Core / Must-Have Features	6
Additional / Nice-to-Have Features	2
Features Tested & Verified	0 verified from supplied evidence

Feature Category Breakdown

S.No	Category	Features in Category	Example Features
1	User Interface (UI)	3	Category selection; budget/preferences input; comparison view
2	Backend / Logic	3	Validation; budget optimization; recommendation orchestration
3	Database / Storage	0 / optional	User preferences/history can be stored if persistence is enabled
4	API / Integration	2	AI API; external product/service APIs
5	Security / Authentication	Planned	Secure API-key handling; authentication if required for the deployed version
